

Summary

3-4 years experience with data engineer. (distributed queue system, database, web crawling, airflow, CI/CD, cloud)
1-2 years experience with data science. (data analysis, machine learning and deep learning)
Github project get 1K stars.

Work Experience

SinoPac Holdings - Software Engineer(Python)

Nov. 2019 - Now

- Develop **python, C#** api for stock/option/future trading. Setup **CI/CD** with GitHub actions.
- Deploy test system for simulating trading by **docker swarm**.
- Collecting distributed system log by **elk, grafana** and **prometheus**, 13 GB log data/day.
- System monitor by **telegram bot**.
- Develop **transaction-by-trade and odd lot trading** API.

Tripreso - Data Engineer

Oct. 2018 - Oct. 2019

- Analysis travel data and build a machine learning model. Estimating increase **3%** orders (revenue).
- Maintain and develop an ETL **distributed queuing system** with 20 machines.
- Optimize the ETL system reduced more than **50%** execution time.
- Develop new product crawler let product volume increase **1.5%**.
- Making **BI charts** provide for other departments.

Projects

FinMind python package

1.3K stars on github.

- Open source of financial data, more than 50 dataset, more than **1 billion, 200GB**.
- **10 million, 1gb, streaming** data per day.
- Transfer dataset from mysql to dolphindb, **reduce 80% (150GB)** data size.
- Automatic update data by **airflow, rabbitmq and celery** (8 cloud machines).
- Automated deployment web, backend and api by **CI/CD**.
- Using **vue, python** to develop web pages. (<https://finmindtrade.com/>).
- Api request **20,000 ~ 30,000** times/day. Up to 70,000 times.
- Design data pipeline for crawler, backend and analysis by **airflow**.

TaiwanTrainVerificationCode2text python package

70 stars on github.

- The verification code consists of 26 English and 10 number, which may be 5 or 6 yards.
- Simulate generating 100,000 images and building CNN models.

Bosch Production Line Performance (Kaggle)

Post-competition analysis, top 6% rank.

- Highly imbalance data, ratio is 1000 : 1, 10 GB dataset size. And the data is 50% missing value, more than 4000 variables.

Grupo Bimbo Inventory Demand (Kaggle)

Post-competition analysis, top 8% rank.

- Time series problem, 8 millions data size. Building models predict inventory demand after 2 weeks.

Instacart Market Basket Analysis (Kaggle)

Final top 25% rank.

- Which products will an instacart consumer purchase again?

Skills

- Experience with **distributed queue system**, rabbitmq and celery. (Linode Cloud)
- Experience with **database**. (MySQL, dolphindb, Redis)
- Experience with **restful api**. (Fastapi).

- Experience with **data pipeline**. (airflow).
- Experience with **virtualisation and containerisation**. (Docker Swarm) Using it manage services of crawler, backend api, finmind api, database and web.
- Experience with **traefik** to manage router and DNS. Include DNS of backend api, finmind api and web. And auto register SSL let's encrypt.
- Experience with **CI/CD** tools, gitlab-CI, github-action. Create automated tests and automated deploy.
- Experience with **monitoring systems** (Prometheus, Grafana, elk, telegram bot).
- Experience with **machine learning** by Python (**xgboost-gpu**) and R (**xgboost, svm, random forest, knn**).
- Experience with **deep learning** by Python (**kears-CNN, LSTM, GRU**).

Education

National Dong Hwa University (GPA : 3.87)

Master of Science, Sep. 2017.

Major : Mathematics and Statistics.

Tamkang University

Bachelor of Science, Sep. 2015.

Major : Mathematics.
